

Non-communicable diseases

Highlights:

- While development assistance for non-communicable diseases has grown over the past 10 years, it remains a small percentage of total development assistance (less than 2.1% in 2022).
- Development assistance for non-communicable diseases flows largely to countries in sub-Saharan Africa.
- NGOs and foundations, who channel the largest amount of funding for non-communicable diseases, were a major disbursing agency of funding for human resources for non-communicable diseases and mental health programs in 2023.

Development assistance for non-communicable diseases dropped by 34.4% between 2020 and 2023.
